Ibragimov Amirshoh

Software Engineer

About me

Let me introduce myself. My name's Amirshoh and I'm a Full-Stack developer. My interest in programming started when I was 11 years old. First I started learning programming online and decided to become a Full-Stack developer. After that, I searched for a good training center to learn programming and the one I liked the most was Najot Talim Academy. That's why I decided to study here. I started learning English at the Cambridge Learning Center when I realized that I couldn't learn programming as much as I wanted without English. I can't say: "I'm experienced in programming". But, I hope to get to it soon. If you want to see my projects, there is a QR code on my CV, scan it and it will take you to my github profile. I hope you like them.
